

# GreenForm Transport Case

Safe and Sustainable.

The GreenForm Transport Case is designed to be the ultimate transport case for your GreenForm products. This sturdy and environmentally friendly transport case ensures that your sustainable signs and displays arrive at their destination in perfect condition, whether they are transported by air, sea or on the road.

## **Made for Protection**

With external dimensions of 66 cm in height, 40 cm in depth, and 127 cm in width, this transport case offers ample space to store and protect multiple GreenForm elements. Its solid construction ensures that the contents remain safe and undamaged, even under the most demanding transport conditions.

## **Environmentally Responsible and Durable**

In the spirit of GreenForm's commitment to environmental responsibility, this transport case is made with sustainable materials. It combines functionality with environmental consciousness, offering a solution that not only protects your products but also the planet.

# Choose GreenForm transport case for a robust and sustainable transport solution.

## Thoughtful Design Without Compromise on Quality or the Environment

The GreenForm Transport Case comes equipped with sturdy locks and handles, making it easy and safe to handle during transport. The black finish with the distinct GreenForm logo signals a professional design that matches the quality of the products it contains.

This transport case is not just a means of transport, but a statement about quality and sustainability that enhances your brand's image. Choose the GreenForm Transport Case for a reliable and environmentally conscious transport solution.

## GreenForm

Denmark has been a front runner in **Green** transformation with a large role in Wind energy. Therefore, we see the opportunity to continue to use our knowledge from Scandinavia in producing greener solutions and bringing them into the international market.

We have possibly found the best in the industry in manufacturing **Green** material and work closely in our R&D to invent tomorrow's **Green** solutions. We work tirelessly on making GreenForm available worldwide in a responsible manner. Join our movement.
